RATES BASED ON SMALL NUMBERS Caution should be exercised in the interpretation of rates based on small numbers. Chance variations in the number of vital events occurring in sparsely populated areas can cause rates to fluctuate widely over time. In accordance with National Center for Health Statistics standards, rates based on fewer than 20 cases are considered unreliable for analysis purposes. Therefore, these rates are not displayed and are indicated by @. Please contact SNJPC at data@snjpc.org if you are interested in using risk factors that do not have published rates for program and planning purposes.
